

Ralph Edge

Current Address:

1354 N Dixie Ave.
Cookeville, TN 38501

Email: rledge21@tntech.edu

Phone: (423) 519 - 9472

Portfolio: <http://www.ralphedge.com>

Blog: <http://www.railsonedge.com>

Permanent:

626 Monroe St.
Madisonville, TN 37354

OBJECTIVE: To build your next web-app.

EDUCATION:

Tennessee Technological University
Cookeville, TN
B.S., Computer Science
GPA - 3.14

RELEVANT COURSEWORK:

Ruby, Python, Java, C/C++, PHP, Bash
Software Engineering, Distributed
Computing, Networks

RECENT WORK EXPERIENCE:

Skyroo Entertainment – Franklin, TN; December '08 – March '09

Contract Web Developer, Telecommute, Ruby on Rails

Social Networking application for use as a band fanclub. Community Engine plug-in; Flash Video/Music upload, conversion, storage on Amazon S3; Phusion Passenger; PayPal Integration; Apache Administration <http://hawknelsonclub.skyroo.com>

Google Summer of Code; May '08 – August '08

Participated in a summer program where Google pays students over the course of the summer to work on Open-Source projects – mine was re-writing some of Ruby's CGI module as a C-Extension, to increase speed.

<http://github.com/balgarath/cgi-ext/>

ADTRAN – Huntsville, AL; January '08 – May '08

Co-Op Web Developer

Worked on parts of some large, production applications, all of which are (unfortunately) behind the ADTRAN firewall. Re-Wrote a PHP admin interface in Ruby on Rails. Got experience with: ASP.net, C#, IIS, MSSQL, Oracle, Baan ERP, MySQL, E-Commerce.

<http://www.adtran.com>

BLACKHAWK INTERACTIVE – Cookeville, TN; May 2007 – August 2007

Web Developer Intern

Created an E-Commerce site with PHP/MySQL, using OSCommerce. Authorize.net integration, HTTPS, Apache Administration. <http://www.printedcoffeecupdesigns.com>

(please see my portfolio and blog for more information on my projects)

INTERESTS:

Ruby, Rails, Unobtrusive Javascript & AJAX w/JQuery. Interested in learning more about server scaling. I like to play guitar(electric, acoustic, base, whatever), and have been experimenting with real-time kernels and applying guitar effects with low latency using the JACK audio server.
